1 CHANGE OVERVIEW

DCP419 is looking to place obligations on any Party or agent to update the Distribution Network Operator (DNO) before any planned De-energisation or communications interruptions on Sites with a Smart Meter. This is to allow DNOs to be able to manage any off supply notifications (via AD1 alerts).

2 CHANGE PLAN UPDATE

The Code Manager previously submitted a plan which went as far as Solution Refinement, finishing in April 2025.

The Code Manager is proposing to extend this out to July 2025 while the following activities take place:

- Continued discussions with the Cross Code Steering Group (CCSG) to determine whether REC or DCUSA should be the lead Code;

- Continued liaison with the Authority to determine if it is possible to change the Ofgem Regulatory Instructions and Guidance (RIGs) outside of the yearly update process; and
- Continued liaison with the Smart Energy Code (SEC) to further explore the possibility of a DCC solution.

Milestone	Activity	From	To		
Definition		**05-Nov-24**	**30-Apr-25**	**05-Nov-24**	**31-Jul-25**
	Code Manager Assessment	November	November	Completed	Completed
	Solution Development	November	February	Completed	Completed
	Impact Assessment	February	March	Completed	Completed
	Solution Refinement	March	April	March	July

3 COMMITTEE ACTIONS

Committee Members are invited to take the following actions:

- **REVIEW** the extension to plan for I0216; and
- **APPROVE** the extension to plan for I0216.
