OVERVIEW

The Meter Manufacturers Make and Type (J0410 / DI048) was not populated as part of the MHHS Programme's data cleanse. However, this information is part of the Supplier Meter Registration Service (SMRS) maintained Meter Technical Details (MTD) for Smart Meters which replace the Data Transfer Catalogue (DTC) MTD Market Messages for Smart Meters in the MHHS environment. Under the current legacy arrangements, it is not possible to populate this Data Item.

CHANGE PLAN UPDATE

The previous Change Proposal Plan only progressed to the Solution Analysis stage because it first needed to confirm whether, after MHHS Migration, any processes still rely on the Meter Manufacturer's Make and Type (DI-048) provided by SMRS through the IF-006 'SMRS Notification of MTD Updates' Market Message for Smart Meters.

An Information Request was open for responses from 23 January until 13 February 2026. Six responses were received, which showed that some Parties do rely on this information for processes, whilst others do not but find the information useful to assist with query resolution.

The plan has been updated to allow for solution analysis and development, including discussion at the March MHHS Expert group and Change Issues Group in April.

Milestone	Activity	From	To
Definition		**01 Jan 26**	**TBC**
	Solution Analysis	Jan	April
	Solution Development	April	June

Following solution development, the Change Report with a further plan will be presented to the Technical Expert Panel, ahead of impact assessment.

COMMITTEE ACTIONS

Committee Members are invited to take the following actions:

- **REVIEW** the update to plan for I0297; and
- **APPROVE** the update to plan for I0297.
