REC GAS DATA ACCESS MATRIX CHANGE

ADMINISTRATIVE CHANGES TO ALIGN TO DATA PERMISSIONS MATRIX

BACKGROUND

The Data Permissions Matrix (DPM) is governed in the Uniform Network Code (UNC) and Data Services Contract (DSC) has been amended following discussions with the DSC Contract Management Committee. Whilst there is no obligation to align the DPM and the Data Access Matrix (DAM) the changes to the DPM are relevant to the DAM – so this change proposes that then DPM changes are reflected in the DAM.

DATA ITEM CHANGES

*red indicates added or removed text to the DAM

Data Type	Data Item	Reason for Change
(Line 54) Meter Asset Data	Imperial Indicator (or Metric / Imperial Indicator)	No changes to the data type or data item but addition of information to the *Retail Energy Code Equivalent Name* (Domestic Premises Indicator) and *where derived* (Consumption Unit Factored Value (DM Service).
(Line 100) Meter Read History	Meter Read Date	No changes to the *data type* or *data item* but addition of information to *where derived* (Gas Flow Day (DM Service)).
(Line 117) Meter Read History	Metered Energy	No changes to the data type or data item but addition of information to *where derived* (addition of Metered Volume).
(Line 127) ~~Supply Meter Point History~~	~~Pre-COVID SMP AQ~~	This data was provided on a short-term basis to support Users in assessing "normal" consumption patterns. The provision of this data expired in October 2022.
(Line 216) ~~Supply Meter Point Information~~	~~Transitional Meter Point~~	This data item was a flag to indicate to incoming Users that Settlement data items would be amended as a result of any Registration activity and this would then trigger an exception process for that User. The functionality supporting this was changed as such this exception process was no longer required. This data item is no longer relevant to any processes.
(Line 232) Supply Meter Point Information	Previous MAM Short Code (or where displayed as Name, the Previous MAM Organisation Name)	Also, the addition of (or where displayed as the Name, the Previous MEM Organisation Name) within the *Retail Energy Code Equivalent Name*.
(Line 233) ~~Supply Meter Point Information~~	~~Previous MAM~~	This data item is a duplication of Previous MAM Short Code (Line 232)
(Line 214) ~~Supply Meter Point Information~~	~~CSEP Id~~	This data item is a duplication of Line 249.
(Line 256) Supply Meter Point Information	CSEP Connection Date	Typo correction.

SERVICE PROVIDER COMMENTS

This change was raised by the GES Provider who has confirmed that these are administrative changes only and will have no associated technical impacts.

CODE MANAGER RECOMMENDATION

On 19/12/2023, the Performance Assurance Board agreed with the Code Manager's recommendation to approve these changes.

NEXT STEPS

The Code Manager will trigger a 10-working day consultation period on 05 January 2024 to 19 January 2024. If the Consultation responses return no concerns that would require the Code Manager to revisit the request, the Code Manager will implement changes to the DAM on 26 January 2024.
