Dear REC Stakeholder,

The Code element of the February 2025 (3.16.0) REC Release has now been implemented.

This release introduces four changes:

- R0168 | Clarify and Strengthen CRS Providers Requirements
- R0208 | Adding the DIP Rules to the Cross Code Steering Group Terms of Reference
- R0210 | Evolution of the CRS Performance Charge
- R0239 | Housekeeping February 2025

REC Change R0120 - Search GES API using MSN was due to for release today 28 February 2025, however this has been deferred due to performance issues on the Gas Enquiry Service (GES). It is appreciated that this may be disappointing to the GES Users who would have been able to utilise the enhanced functionality. R0120 will look to be implemented as soon as the GES Service Provider is able to do so.

All the updated REC Products can be located on the REC Portal through Code Products, please see below for more detail:

- REC Main Body
- Schedule 1 – Interpretations and definitions
- Schedule 6 – Performance Assurance
- Schedule 14 – Metering Operations
- Schedule 23 – Registration Services
- Schedule 26 – Switching Service Management
- Switching Operator Service Definition
- Central Switching Service Definition
- Major Switching Incident: Switching Operator Best Practice Document (New)
- Switching Operator Incident Management Policy
- CCSG terms of Reference
- GES Supply Point Enquiry API Technical Specification
- REC Baseline Statement

Should you have any questions relating to this release, please raise a Service Desk Enquiry or email enquiries@recmanager.co.uk. Alternatively, you can contact your Operational Account Manager.
