OVERVIEW

MHHS removes certain Data Items (e.g. Profile Class, Measurement Class, Standard Settlement Configuration, Time Pattern Regime etc.) that are important to wider processes and products offered to consumers. This proposal is seeking a mechanism for electricity Market Participants to look up the previous entries for these legacy Data Items held before MHHS Migration begins.

BACKGROUND

1 SUMMARY

REC Issue I0290 Legacy Data Item API Service has been raised by an industry participant who has a number of roles including Advanced Data Service Provider as they believe there is a temporary requirement for industry to continue to have the ability to access legacy Data Items that will be removed when a Metering Point is migrated to MHHS. Examples of such Data Items include Profile Class, Measurement Class, Standard Settlement Configuration (SSC) and Time Pattern Regime (TPR). They state the Data Items are important for supporting industry processes, including offering products to Consumers.

2 PROBLEM STATEMENT

The loss of certain Data Items for MHHS Migrated Metering Points may impact Parties in their ability to carry out and support industry processes, or in what products they are able to offer Consumers, including Reverse Migrations.

3 IMPACTS

CONSUMERS
Indirect

REC PARTIES AND SERVICE USERS
Energy Suppliers
MOAs
Data Services

REC DOCUMENTS / PRODUCTS
None

MHHS
While this Change Proposal does not impact MHHS, it has been generated by a need identified by a Party from changes made by MHHS.

4 CROSS-CODE IMPACTS

This Change Proposal may be cross-code with the Data Transfer Services Agreement (DTSA). This could potentially have a solution to have the data provided via the DTSA and funded under the Retail Energy Code.

5 PROPOSAL PLAN

Milestone	Activity	From	To
Definition		**12 Jan 26**	**31 Mar 26**
	Solution Development	January	March
	Information Request	January	February

The Code Manager is submitting a Proposal Plan only covering solution development and an Information Request, so it can be established if there is an industry wide need for this solution, or if it specific to the Proposer.

6 STAKEHOLDER ENGAGEMENT

This was discussed at the Change Issues Group meeting on 15 January 2026, with an Information Request issued on the same day. This is to allow the Code Manager to establish if there is an industry wide need for this solution, or if it specific to the Proposer.

7 PRIORITY STATUS AND URGENCY

PRIORITISATION MATRIX

Category	Significance / Resource impacts / Urgency	Further selection / breakdown	Score (0-3)	Weighting	Weighted Score
Impacts	Consumer Impact	Indirect	1	27	27

9 GLOSSARY

TERM	DEFINITION
Data Item	means the most granular level of data defining a specific attribute in respect of a data type, the permissible values for which are defined and controlled in the Data Item Catalogue.
Market-wide Half Hourly Settlement (MHHS)	means market-wide half hourly settlement, which is being introduced pursuant to the BSC (see MHHS Implementation).
Metering Point	has the meaning given to it in the Electricity Distribution Licence, which for the time being means: “the point, determined according to the principles and guidance given in the MRA Transition Schedule to the Retail Energy Code, at which a supply of electricity taken into or conveyed from the licensee’s Distribution System: (a) is or is intended to be measured; or (b) where Metering Equipment has been removed, was or was intended to be measured; or (c) in the case of an Unmetered Supply, is treated as measured.”
MHHS Metering Point	means a Metering Point which has been MHHS Migrated, and which continues to operate in that state, or a Metering Point which has been established to operate within MHHS arrangements.
MHHS Migration	means the act of migrating a Metering Point in accordance with the REC MHHS Migration Schedule. "MHHS Migrated" shall be interpreted accordingly.
