Utilita (Supplier)	Utilita agree with the case for change which will allow EES API users to utilise the new data items.	Noted, thank you.
SSE Energy Supply (Supplier)	SSE supports the standardisation of fields sent on the API. We have noticed the following data items do not have any details next to them. I would assume they will both be char-8-YYYMMDD but it would be prudent to have the document complete for all data items. trading_status_efd supplier_efd	Thanks for your query. This was provided to the EES Provider for a response and potential incorporation for a future change to the API Specification document.
