BACKGROUND

1 BACKGROUND

The EES Provider has made some alterations to the EES API Interface Specification to incorporate new data items that support Market-wide Half Hourly Settlement (MHHS) Stage 0 as well as some housekeeping changes and clarifications to the methods within the API.

Without the updated Technical Specification, EES API users will not be able to utilise the new data items or have further detail on the data items returned in the methods.

2 PROBLEM STATEMENT

The current version of the EES API Technical Specification (V3.1.4) does not contain the latest updates from the EES Provider. Without these updates, API users will not be able to utlilise the new data items or have further detail on the data items returned within SearchUtilityAddress and GetTechnicalDetailsByMpan methods.

3 USER STORIES

REF.	USER STORIES
MARKET PARTICIPANT USER STORIES	
M1	As an EES API User, I want to ensure that I have the most up to date technical information so that I can use the API in the most effective way.
M2	As the EES Provider, I want to ensure that the most up to date technical information is available to Users.

PROPOSAL

4 PROPOSED SOLUTION

The EES Technical Specification is a working document which provides guidance on the use of the EES API. As the EES API evolves, either through a REC Change or outside of the REC, Users need to be updated with the new guidance and technical specification.

In July 2023, updates were made to the technical specification following the MHHS Stage 0 implementation. This provided further detail on character lengths, data item types, nullable values and example values for the SearchUtilityAddress and GetTechincalDetailsByMpan methods as well as some small housekeeping amendments. For these updates to now be visible on the REC Portal, a REC change is required due to the categorisation of the document.

5 DRAFT LEGAL TEXT

The legal text changes to deliver the proposed solution to R0149 can be found here.

6 DELIVERY AGAINST CHANGE PROPOSAL PLAN

All milestones within the Change Proposal Plan have been met. The Change Proposal Plan can be found here.

7 KEY RISKS, ASSUMPTIONS, ISSUES AND DEPENDENCIES

7.1 RISKS AND ISSUES

No.	RISK	NOTES	MITIGATION
R1	The Change Proposal's implementation is during the appeals window.	R0149 is planned to be approved by the Technical Expert Panel on 29/11/2023, however, implementation is on 06/12/2023 which is within the 10 Working Day Appeal Window.	If an appeal is raised, the relevant REC document will be rolled back on the Portal and the REC Baseline Statement.

8 PROPOSED IMPLEMENTATION DATE AND APPROACH

PROPOSED IMPLEMENTATION DATE	06/12/2023

PROPOSED IMPLEMENTATION APPROACH	BIG BANG

Due to the simplicity of the Change and the ease of implementation, the next REC Release (extra-ordinary) is proposed.

9 BUSINESS CASE ASSESSMENT

9.1 BENEFITS

INTANGIBLE BENEFITS	BENEFITS DESCRIPTION
Accurate information within the REC	Without the updated Technical Specification, EES API Users will not be able to utilise the new data items or have further details on the data items returned within the SearchUtilityAddress and GetTechnicalDetailsByMpan methods.

9.2 COST BENEFIT ANALYIS SUMMARY

There are no costs associated with this change and the intangible benefits alone create a positive case for change.

10 CASE FOR CHANGE

10.1 SELF GOVERNANCE

The Code Manager considers that there is a positive case for change to implement the solution on the basis that:

- the proposed solution appropriately resolves the original Problem Statement;
- there are no costs associated with the implementation of the solution;
- without the additional information provided within the new EES API Technical Specification, EES API Users will not be able to utilise the API in the most effective way.

11 CODE MANAGER'S RECOMMENDATION

The Code Manager recommends that the Technical Expert Panel:

- **APPROVE** the proposed change solution;
- **APPROVE** the proposed implementation approach; and
- **APPROVE** the proposed implementation date of **06 December 2023**.

12 CONSULTATION PLAN AND NEXT STEPS

The consultation on this Preliminary Change Report for R0149 will be published on the REC Portal on **03 November 2023** and closes on **17 November 2023.**

Following consultation, the Code Manager will produce an updated version of this Preliminary Change Report (referred to as the Final Change Report). This will include the outcome of the consultation, setting out a summary of the consultation submissions and the Code Manager's response.

The Final Change Report will be issued to the Technical Expert Panel to make its determination on **29 November 2023**.
