SCHEDULE XX

Electricity Supply to Hydrogen Electrolysers

Version: [1.0] Effective Date: [TBC]

Domestic Suppliers	N/A
Gas Non-Domestic Suppliers	N/A
Electricity Non-Domestic Suppliers	Mandatory
Gas Transporters	N/A
Distribution Network Operators	N/A
DCC	N/A
Meter Equipment Managers	N/A
Non-Party REC Service Users	N/A

Version Number	Implementation Date	Reason for Change
1.0	[TBC]	Initial version for Change Proposal R0160

1 Introduction

1.1. This REC Schedule sets out obligations on Electricity Suppliers in respect of their electricity supplies to Low Carbon Hydrogen Producers. The purpose of these obligations is to ensure that the LCHA Counterparty has access to the data it needs to perform its role as such in relation to Low Carbon Hydrogen Agreements.

2 Disclosure to LCHA Counterparty

2.1. Each Electricity Supplier who is (or was) from time to time the supplier of electricity to a Low Carbon Hydrogen Producer shall provide to the LCHA Counterparty such information relating to that electricity as the LCHA Counterparty may from time to time request.

2.2. In particular, where an Electricity Supplier is (or was) supplying electricity to a Low Carbon Hydrogen Producer under an Energy Contract which the supplier and the producer intend to be an Eligible PPA (as defined in the Low Carbon Hydrogen Standard), then the Electricity Supplier shall:

(a) provide to the LCHA Counterparty the information which the Low Carbon Hydrogen Producer and/or the Electricity Supplier are required to provide to the LCHA Counterparty in order for the Energy Contract to constitute an Eligible PPA; and
