CHANGE OVERVIEW

This Change seeks to create a new tool to allow the manual correction of data discrepancies in the Electricity Retail Data Service (ERDS) and Central Switching Service (CSS) systems, post Market-Wide Half Hourly Settlement (MHHS) implementation.

CHANGE PLAN UPDATE

Following the Consultation period in September, we need time to liaise with the BSC and the Service Provider so that the solution documentation can be refined for greater clarity before Final Recommendation. The Code Manager is also working with the CSS Provider to gather insight into the root cause of the discrepancies.

Final Determination has been pushed back to the next Panel; this will not impact the implementation or have any detrimental impact on the equivalent BSC modification.
